

Environmental Policy Statement CG-POL005

POLICY STATEMENT

Chirmarn Group's mission is to be recognised and respected as one of the market leaders in the supply of services for the identification, treatment, safe removal and disposal of all types of asbestos.

Policy

Our policy and associated arrangements are intended to meet or exceed all environmental regulations, laws and codes of practice. We recognise the ability of our activities to impact on the environment and are committed to monitoring, controlling and improving our practices where practical and influencing those we work with to bring about a positive environmental culture.

Commitment

The Chirmarn management team is empowered to provide the people, organisation and resources to fulfil our obligations and commitments to the protection of the environment. Our commitments include:

- ✦ Prevention of pollution
- ✦ Making efficient use of energy resources, taking appropriate opportunities to reduce waste and promote the reuse and recycling of materials
- ✦ Avoiding wherever practical the use of environmentally damaging substances, materials or processes
- ✦ Ensuring all waste materials are stored and disposed of safely
- ✦ Minimising environmental nuisance arising from any work activity
- ✦ Ensuring compliance with all statutory HSE requirements as a minimum
- ✦ Ensuring adequate skills, training and resources are available
- ✦ Empowering, engaging and making our employees responsible, allowing them to challenge any aspect that poses risks to the environment
- ✦ Always acting in a professional, organised and controlled manner.

All employees are given the authority and support to call 'all stop' to any activity should they feel it unsafe.

Approval

This policy has been collaboratively reviewed and approved by the senior management team and is fully endorsed at the highest level of the organisation. It is reviewed annually, published locally and communicated to the entire workforce to ensure understanding and compliance
